Examples of multiaudience package use

Boris Veytsman

Date: 2015/07/11 22:49:40
1 Introduction

We defined three audiences:
\SetNewAudience{admins}\SetNewAudience{devs}\SetNewAudience{execs}

2 The CurrentAudience command

The current audience is CurrentAudience.

The current audience is execs.

3 The showto command

Note the nesting here:
\showto{admins}{This text is visible to admins only}\footnote{And admins see a footnote.}
\showto{admins, devs}{This text is visible to admins and devs. \showto{devs}{This text is visible to devs.}}
\showto{-, admins}{This text is not visible to admins.}
This text is visible to everybody\footnote{And everybody sees a footnote}.

This text is not visible to admins. This text is visible to everybody$^1$.

4 The shownto environment

\begin{shownto}{admins}
This is for admins only.
\end{shownto}

\begin{shownto}{-, admins}
This is for everybody \textit{but} admins.
\end{shownto}

This is for everybody \textit{but} admins.

$^1$And everybody sees a footnote
5 Use of verbatim text

\begin{shownto}{-,execs}
We cannot use \texttt{verbatim} inside shownto, but we can use \texttt{input} with \texttt{verbatim} inside.
\end{shownto}

We also can use \texttt{path} and \texttt{url} from hyperref package: \path{a$2}, \url{http://borisv.lk.net/cv/cv.html#Publications}.
\input{verbatim}

We also can use \texttt{path} and \texttt{url} from hyperref package: \path{a$2}, \url{http://borisv.lk.net/cv/cv.html#Publications}.
\end{shownto}

Another option is the use of \SaveVerb and friends from fancyvrb package:

\begin{SaveVerbatim}{SavedVerb}
This is a verbatim line: ~!@#$%^&*{}:"'<? 
\end{SaveVerbatim}

\begin{shownto}{-,devs}
\UseVerbatim{SavedVerb} 
\end{shownto}

This is a verbatim line: ~!@#$%^&*{}:"'<?

6 Syntactic sugar

We have a special footnote command \Footnote{admins}{This footnote is for admins only.}.

We have a special footnote command.

\begin{Subsection}{admins}{Admins-only subsection}{This subsection is visible only to admins} 
We have special sectioning commands. 
\end{Subsection}

\begin{Subsection}{-,admins}{Not for admins}{This subsection is not visible to admins}
Another example. \showto{devs}{This is visible to devs only.} 
\end{Subsection}

6.1 This subsection is not visible to admins

Another example.
